

Company introduction

Jiangsu Maslech Medical Technology Co.,Ltd , located in China Medical City, is a high-tech enterprise which has basic research, application development and achievement transformation. It specializes in R&D and production of minimally invasive surgery (laparoscopy) , anesthesia, gynecology, first-aid, imaging, digital hospital software integration, health care and other mid-and-high-end medical device products. Maslech has 8,000m² production and office base including 5000 mm²GMP standard workshop, full facilities laboratory, clinical research base and all kinds of advanced production equipments and scientific instruments. So far, it has more than 30 patents for invention and utility model and a number of products obtain the title of national high- tech products.

So far, most products are certified by CE, FDA , ISO13485 and have been exported to more than 40 countries and regions in Middle East, Far East, Southeast Asia, Europe, America , Africa and Oceania.

Catalogue

First-aid Series	1-2
Manual Suction Units.....	1-2
Endoscopy Series	3-4
Disposable Biopsy Forceps.....	3-4
Laparoscopy Series	5-16
Implantable Ligating Clips.....	5-6
Clip Appliers.....	7-8
Disposable Sheath Trocars.....	9-10
Disposable Multi-channel Single-port Laparoscopic Trocars.....	11-12
Disposable Retrieval Devices.....	13-14
Disposable Fascia Closure Systems.....	15-16
Anesthesia Series	17-18
Laryngoscopes.....	17-18
Gynecology Series	19-20
Disposable Cervical Brushes.....	19-20
Surgery Series	21-22
Disposable Incision Protectors.....	21-22
Imaging Series	23-24
Medical Printing Films.....	23-24

Manual Suction Units

Manual Suction Units

【 Intended Use 】

Extraction of hematocele and hydrops in conventional medical rescue.
Extraction of foreign bodies and sputum sample liquid in the trachea. Subcutaneous blood, venom extraction .
Negative pressure device .

【 Special Features 】

- ①MALH suction unit is a light portable suction unit,which can be one-hand operation,and let the other hand free to perform other important tasks of the first-aid.
- ②MALH suction unit is designed to provide simple operation, by the adjustment knob to provide different suction pressure.
- ③Limit value of negative pressure: $\geq 39.9\text{KPA}$ Disposable container volume:300ML

Disposable Biopsy Forceps

Disposable Biopsy Forceps

【 Intended Use 】

The product is used to obtain bronchial, gastrointestinal mucosal tissue for endoscopic biopsy.

【 Special Features 】

- ① Coated with super-lubricious PE, effectively decrease the friction to endoscope channel.
- ② Standard cup design, obtain appropriate amount tissue, less damage.
- ③ The jaw is made up of medical stainless steel, welded by advanced laser technology, the joint is very firm.
- ④ Rigid four connecting rod structure, with fine mechanics function, makes sample collection much easier.
- ⑤ EO sterilization, single packed, no need to re-sterilize before use, for single use only to prevent cross infection.
- ⑥ Product quality is highly guaranteed by production in clean room and strict inspection before delivery.

Implantable ligating clips

Implantable ligating clips

【 Intended Use 】

The product is intended to be used in ligating vessel /tissue bundle for open or laparoscopic surgery.

General Surgery:

Gastrectomy/Cholecystectomy/Splenectomy/Coloproctectomy/ Appendectomy/Hepatectomy /Gastrojejunostomy/Fundoplication etc.

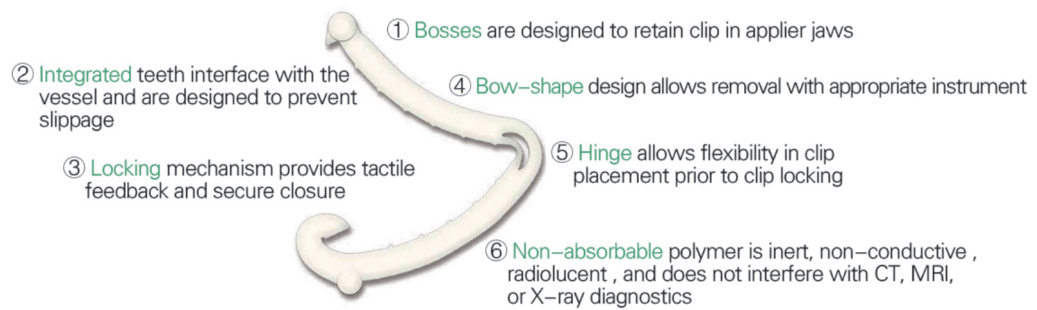

Obstetrics and Gynecology:

Salpingectomy/oophorectomy/Hysterectomy/Pelvic Lymphadenectomy/Chocolate Cyst Excision etc.

Urinary Surgery:

Nephrectomy/Adrenalectomy/Cyst Ablation/Radical Cystectomy/Radical Prostatectomy ect.

Clip Applicators

Clip Appliers

【 Intended Use 】

The product is intended to be used in placing and closing implantable ligating clip for open or laparoscopic surgery.

【 Special Features 】

- ① Be made of medical high level stainless steel non-poisonous material.
- ② Meet mechanical design, easy to operation.
- ③ Perfect handle design, good grasping ability.

Disposable Sheath Trocars

Disposable Sheath Trocars

【 Intended Use 】

The product is indicated to establish a port of entry for instruments in patients requiring minimally invasive surgical (laparoscopy) procedures.

【 Special Features 】

- 
- ① Efficient- integrated general cannula cap
 - No need exchange adapter during surgery.
 - Save operation time.
 - ② Convenient- detachable design,easy for specimen retrieval
 - Detachable cannula cap, easy for specimen and tissue retrieval during surgery.
 - ③ Stable- double sealing, prevent gas leakage
 - Special material, durable double sealing system.
 - Reduce gas leakage when instruments get in or out of the trocar.
 - Maintain artificial pneumoperitoneum even instruments get in or out of the trocar for many times.
 - Stable gas tightness meet the demand of high-level laparoscopic surgery.
 - ④ Reliable- greater abdominal wall retention
 - The cannula's integrated thread design provides greater abdominal wall retention.
 - Minimal trocar slip-outs.
 - ⑤ Efficient- low system drag force
 - Low system drag force and Funnel Lead-in.
 - Enables smooth,one-handed instrument exchange.
 - ⑥ Innovative- bladeless, optical tip
 - Direct visualization of tissue layers eliminates blind entry insertion.
 - The bladeless tip separates, rather than fibers, pushing tissue and vessels away facilitate wound healing.
 - ⑦ Various- multiple specifications,different materials for choice.
 - Various specifications meet different demands from clinical surgeries.
 - Stainless steel or medical polymer materials trocars for different choice.

Disposable Multi-channel Single-port Laparoscopic Trocars

Disposable Multi-channel Single-port Laparoscopic Trocars

【 Intended Use 】

The product is used as a working channel for endoscopic instruments pass in and out during laparoscopy surgery.

【 Special Features 】

- ① 360 ° protection of wounds and tissues, comprehensive prevention of incision infection.
- ② Good airtightness and pneumoperitoneum effect throughout the surgery ensure a uninterrupted operation.
- ③ Transparent upper cover design provides a clear surgical field of view.
- ④ Multi channel design for 5-12mm instruments.

Disposable Retrieval Devices

Disposable Retrieval Devices

【 Intended Use 】

It is a disposable device used as a receptacle for the collection and tissue specimens during laparoscopic surgery.

【 Special Features 】

- ①Accessories made of medical grade polymer materials meet with national standards and the specimen bag is made of advanced medical TPU thin film, flexible and transparent, not easy to damage, good vision.
- ②Specimen bag is hidden in the front sleeve cleverly , it can get into the operation field through the trocar successfully, without pulling out the sheath during operation, high-quality stainless steel sheet opening device can expand specimen bag.
- ③Excellent substitutes of traditional gloves, plastic bags and other self-made bags , easy to operate, save time and effort.
- ④It contributes to remove various resected objects (malignant tumor, cyst, abscess resection, endometrium tissue,and so on) in laparoscopic surgery , to prevent infection when disease tissue contact healthy tissue and inflammation which was induced by tumor plantation and tissue liquid penetration.
- ⑤The product has been sterilized with ethylene oxide, for single use only to prevent cross infection.
- ⑥Various specifications and models, different volume bags for clinical choice.

Disposable Fascia Closure Systems

Disposable Fascia Closure Systems

【 Intended Use 】

It is used for percutaneous suture in laparoscopic surgery to close the surgical incision.

【 Special Features 】

- ① Help surgeons to close port site easily, fast and safe in laparoscopic endoscopic surgery.
- ② Effective control of needle insertion depth, high safety performance.
- ③ Applicable to patients of various sizes, up to 1cm muscle film shrink effect.
- ④ Effectively minimizes post-operative complications including infection, bleeding, and port site hernia.

Laryngoscopes

Laryngoscopes

【 Intended Use 】

Laryngoscope is an instrument used to introduce endotracheal tube into an unconscious person in general anesthesia.

【 Special Features 】

- ①The laryngoscopes of specification FT adopt MALH super bright LED cold light source technology, providing a clear vision for operator.
- ②The laryngoscopes of specification UB adopt perfect hommization technology,handle with anti-skidding lines design for decreasing gripping power, good control and comfortable handle. Bow-shape design based on oropharynx anatomical characteristics, it can meet the intubation requirements for high pharynx patient. High light LED source,stronger light,the luminosity at the head end of blade is greater than 1500lux, providing a clear vision for operator. Proprietary formula injection molding, high anti- tensile strength, meet the clinical strength standard of laryngoscope.Integrated national patent design.
- ③Individually sterile packaged preventing medical cross infection.
- ④Meet clinical demand,and superior to the metal laryngoscopes.

Disposable Cervical Brushes

Disposable Cervical Brushes

【 Intended Use 】

Disposable cervical brush is used for sampling the cervical cells and making smear in clinical gynecological examination.

【 Special Features 】

- ① Various specifications for wide choice.
- ② Thin, soft, and high density brush head, it can sample more specimen, and the injury to cell is minimal.
- ③ Production in sterile workshop, delivery after strict inspection.
- ④ Individually sterile packaged preventing medical cross infection.

Disposable Incision Protectors

Disposable Incision Protectors

【 Intended Use 】

Disposable Incision Protector is used for endoscopic surgery, small incision surgery. It can obviously extend the surgery field, protect wound from damage/injury and contamination.

【 Special Features 】

- ① 360 ° non-destructive wound retraction and protection.
- ② Significantly decrease incision infection/contamination.
- ③ Maximum exposure within a minimum incision size and provide good surgical visualization.
- ④ Even tension reduces tissue damage and pain.
- ⑤ Keep wound moisturized, with wound edges visible.

Medical Printing Films

Medical Printing Films

【 Intended Use 】

Medical printing film is widely used for high resolution medical graphics output, like CT, CR, MRI, B ultrasound, etc.

【 Special Features 】

- ① High resolution with superb image presentation performance.
- ② Adopted on excellent polyester film, produced by the special coating technology.
- ③ MPET base-materials, environmental non-toxic, without any peculiar smell and harmful gas.
